Built to handle any detailing situation, the new LHR 15 MarkIII is the new frontier of detailing. The ergonomic design allows for precise paint correction with complete comfort, in curved surfaces and difficult to reach areas.

The LHR 15 MarkIII operates at a higher rpm compared to the LHR21 MarkIII. This increased speed provides equivalent correction and does so with a pad diameter and orbit that are more conducive to curved or varied surfaces.

MICROFIBER
PADS

MICROFIBER
COARSE

An individual microfiber filament is many hundred times smaller than the closest natural fiber, thus giving a pad constructed of microfiber exponentially more surface area. By dramatically increasing the surface area of the polishing fabric material BigFoot Blue Coarse Microfiber Pads maximize the defect removal rate of BigFoot Random Orbital Polishers.

MICROFIBER
FINE

Compared to relative foam polishing pads, RUPES BigFoot Yellow Fine Microfiber pads offer an increased defect removal rate without sacrificing finish quality when used with BigFoot Random Orbital Polishers. These pads feature patented spiral cooling slots to reduce heat build on the paint, and the unique 1-piece molded construction helps to minimize pad delamination common with glued pads offered by competitors.
